

AgriSolutions Inc. presents

AS 103 - Taking Action to Improve Performance

January 12 & 13, 2010

or

February 16 & 17, 2010

Why is it important to attend AS 103 - Taking Action to Improve Performance?

Because AgriSolutions® is dedicated to providing you informational education programs that have to do with your money.....how to potentially make more of it with your agricultural business, and what to do with increased revenue once you have it.

During our AS103 – Taking Action to Improve Performance course you will complete a Financial Performance Analysis. Using your own operation's financial data you prepare and produce a unique historical farm financial performance report. Analysis of this report demonstrates the historical revenue-generating capacity and efficiency of the operation, reveals potential financial opportunities, and highlights areas in need of improvement. This report serves as a critical instrument that drives the remainder of the course; providing a unique learning experience customized to each producer's individual and specific business needs.

You will build action plans to accomplish objectives you identify as critical to your business performance. Case studies are used only as a means of teaching the concepts and for initial instruction on worksheet completion. You use your operation's real financial information to produce your own road map designed to improve your future. Certified AgriSolutions instructors assist you with the completion of the course work every step of the way.

Registration Fee:

\$325 1st person; \$100 2nd person from same operation

****Business Management System clients receive one free class registration every year****

Registration Deadline:

December 28, 2009 for January 12 & 13 class
